

Regarding your "localism" and LPFM I have 3 points: 1) Stations like K-LOVE radio serves me in my community by providing local messages and a far better quality of sound than other local smaller stations 2) Disruption of this station would be nothing less than devastating to those of us that depend on Christ daily 3) Is it not in the public interest to have family (by-the-way, on this station that means clean, no filth) radio? Many friends I have depend on this station to help promote positive values in their families as well, but may not contact you because the "public" is not aware of this "localism" campaign! I do not live in a major city, small stations cannot offer what K-LOVE does. Their programs do not feature current artists, lack financial means to purchase proper equipment and as a result, offer static filled poor quality radio. If I purchase satellite radio (because local stations have such poor quality) how will that help my community stations? Remember, satellite radio has no concern over local announcements like K-LOVE does. It seems to me that this is suppression of free speech because you would be intentionally blocking K-LOVE out! Perhaps, while my radio is in the FM band, I might switch to another local station and support them. If I am forced to switch to satellite radio, bye-bye local FM stations! I do not see how a block of K-LOVE will HELP local stations, if they can't compete now, they won't ever.
